CAREER OBJECTIVE

Software Developer with hands-on experience in Java, Spring Boot, React.js, PostgreSQL and RESTful API development through industry training and full-stack projects. Proficient in designing scalable backend applications, implementing secure JWT authentication and building responsive web applications using modern development practices. Seeking an entry-level Software Engineer or Java Full Stack Developer role to contribute strong backend development skills and continue growing in enterprise application development.

TECHNICAL SKILLS

- **Languages:** Core Java, SQL, Python, JavaScript
- **Frameworks:** Spring Boot, Spring Data JPA, Hibernate, React.js, Django, ASP.NET
- **Databases:** MySQL, PostgreSQL, MongoDB, DBMS
- **Tools:** Git, GitHub, Maven, Docker, Linux, Postman
- **IDEs:** IntelliJ IDEA, VS Code, Visual Studio

WORK EXPERIENCE

Graduate Engineer Trainee @ YashUma Global Venture Pvt. Ltd., Kolhapur (Feb '26 – Aug '26)

- Developed production-ready full-stack applications using Java Spring Boot, React.js, and PostgreSQL during a six-month Software Developer Trainee program.
- Designed and developed RESTful APIs using Spring Boot, optimized CRUD operations with Spring Data JPA. Built dynamic and responsive React.js user interfaces and managed relational data using PostgreSQL.

Technologies: Java, Spring Boot, Spring Data JPA, Hibernate, React.js, PostgreSQL, Maven, Git

Cyber Security Intern @ DCDIUM Technologies Pvt. Ltd., Pune (Jun '24 – Nov '24)

- Configured firewall solutions and conducted remote security analysis, network troubleshooting, and protocol documentation.
- Performed vulnerability assessments and contributed to security hardening recommendations for client environments.

Technologies: Networking, Firewall Configuration, Linux, Security Analysis

EDUCATION

- **M.Sc. CS (Cyber Security) @ CSIBER College, Kolhapur | 63.34%** (Jun '23 – May '25)
- **B.Sc. CS @ Doodhasakhar Mahavidyalaya, Bidri, Kolhapur | 84.34 %** (Jun '20 – Mar '23)
- **XII(HSC) @ Doodhasakhar Vidyaniketan & jr. College, Bidri | 60%** (Mar '19 - Mar '20)

PROJECTS

Food Delivery Web App | [GitHub](#) (Feb '26 – Mar '26)

- Developed a modular React.js frontend with reusable components; designed a normalized PostgreSQL database with 10+ relational tables covering restaurants, menus, customers, orders, and payments.
- Implemented a layered Spring Boot architecture using Controller, Service, and Repository layers with Spring Data JPA for clean, maintainable backend development.
- Integrated JWT authentication and role-based access control (RBAC) for customers and admins; built RESTful APIs for restaurant listing, menu management, order placement, and payment workflows.

Technologies: Java, Spring Boot, Spring Data JPA, React.js, PostgreSQL, JWT, Maven

Water Jar Distribution Mobile App | [GitHub](#) (Apr '26 – Jun '26)

- Created an Android water jar delivery application using Flutter for ordering and real-time delivery tracking by customers.
- Developed RESTful APIs using Spring Boot for customer management, inventory tracking, order processing, and delivery management.
- Integrated Spring Boot REST APIs with PostgreSQL to enable real-time order synchronization and delivery tracking.

Technologies: Java, Spring Boot, Flutter, PostgreSQL, REST APIs

Library Management System | [GitHub](#) (May '26 – Aug '26)

- Built a full-stack Library Management System REST API using Spring Boot, Spring Data JPA, and MySQL.
- Implemented complete CRUD, a borrowing/returns workflow, search, and automated overdue fine calculation across relational entities.
- Resolved JSON serialization issues, reduced payload size on large lists, and integrated Swagger/OpenAPI for interactive testing.

Technologies: Java, Spring Boot, Spring Data JPA, MySQL, Swagger/OpenAPI

CERTIFICATIONS

Core Java Training @ FUEL Institute (Friends Union for Energizing Lives), Pune (Mar '25)

- Completed hands-on Java training covering OOP concepts, Collections Framework, and core data structures using IntelliJ IDEA.

AWS Solutions Architecture Job Simulation (Remote) (May '25)

- Completed designing a simple, scalable, hosting architecture.
